Introduction

MARNING

See the *Important Safety and Product Information* guide in the product box for product warnings and other important information.

Always consult your physician before you begin or modify any exercise program.

Getting Started

When using your device the first time, you should complete these tasks to set up the device and learn about the basic features.

- 1 Charge the device (Charging the Device).
- 2 Install your device using the standard mount (Installing the Standard Mount) or the out-front mount (Installing the Out-Front Mount).
- 3 Turn on the device (Turning On the Device).
- 4 Locate satellites (Acquiring Satellite Signals).
- **5** Go for a ride (Going for a Ride).
- 6 Upload your ride to Garmin Connect™ (Sending Your Ride to Garmin Connect).
- 7 Register the device (Registering Your Device).

Charging the Device

NOTICE

To prevent corrosion, thoroughly dry the USB port, the weather cap, and the surrounding area before charging or connecting to a computer.

The device is powered by a built-in lithium-ion battery that you can charge using a standard wall outlet or a USB port on your computer.

NOTE: The device will not charge when outside the temperature range of 32° to 104°F (0° to 40°C).

1 Pull up the weather cap 1 from the USB port 2.

- 2 Plug the small end of the USB cable into the USB port on the device.
- 3 Plug the large end of the USB cable into an AC adapter or a computer USB port.
- 4 Plug the AC adapter into a standard wall outlet. When you connect the device to a power source, the device turns on.
- 5 Charge the device completely.

About the Battery

⚠ WARNING

This device contains a lithium-ion battery. See the *Important Safety and Product Information* guide in the product box for product warnings and other important information.

Installing the Standard Mount

For the best GPS reception, position the bike mount so the front of the device is oriented toward the sky. You can install the bike mount on the stem or the handlebars.

- 1 Select a secure location to mount the device where it does not interfere with the safe operation of your bike.
- **2** Place the rubber disk ① on the back of the bike mount. The rubber tabs align with the back of the bike mount so it stays in place.

- 3 Place the bike mount on the bike stem.
- **4** Attach the bike mount securely using the two bands 2.
- **5** Align the tabs on the back of the device with the bike mount notches ③.
- 6 Press down slightly and turn the device clockwise until it locks into place.

Installing the Out-Front Mount

- 1 Select a secure location to mount the Edge device where it does not interfere with the safe operation of your bike.
- 2 Use the hex key to remove the screw ① from the handlebar connector ②.

- 3 If necessary, remove the two screws on the back side of the mount ③, rotate the connector ④, and replace the screws to change the orientation of the mount.
- **4** Place the rubber pad around the handlebar:
 - If the handlebar diameter is 25.4 mm, use the thicker pad.
 - If the handlebar diameter is 31.8 mm, use the thinner pad.
- **5** Place the handlebar connector around the rubber pad.
- 6 Replace and tighten the screw.

NOTE: Garmin[®] recommends a torque specification of 7 lbf-in. (0.8 N-m). You should check the tightness of the screw periodically.

7 Align the tabs on the back of the Edge device with the bike mount notches ⑤.

Introduction

8 Press down slightly and turn the Edge device clockwise until it locks into place.

Releasing the Edge

- 1 Turn the Edge clockwise to unlock the device.
- 2 Lift the Edge off the mount.

Turning On the Device

The first time you turn on the device, you are prompted to configure system settings and profiles.

- 1 Hold 🖒.
- 2 Follow the on-screen instructions.

If your device includes ANT+ TM sensors (such as a heart rate monitor, speed sensor, or cadence sensor), you can activate them during configuration.

For more information about ANT+ sensors, see ANT+ Sensors.

Keys

1		Select to enter sleep mode and wake the device. Hold to turn the device on and off.	
2	Ç	Select to mark a new lap.	
3	I	Select to start and stop the timer.	

Home Screen Overview

The home screen gives you quick access to all the features of the Edge device.

RIDE	Select to go for a ride.	
	Select to go for a fide.	
Train >	Select to change your activity profile.	
Where To?	Select to search for and navigate to a location.	
Calendar	Select to view scheduled activities and completed rides.	
History	Select to manage your history and personal records.	
Courses	Select to manage your courses.	
Segments	Select to manage your segments.	
Workouts	Select to manage your workouts.	
*	Select to view the settings menu.	

Using the Touchscreen

 When the timer is running, tap the screen to view the timer overlay.

The timer overlay allows you to return to the home screen during a ride.

- Select **X** to close the page and return to the previous page.
- Select sto return to the previous page.
- Select \spadesuit to return to the home screen.
- Select ↑ and ↓ to scroll.
- · Select @ to search near a location.
- Select to delete an item.

Viewing the Connections Page

The connections page displays the status of the GPS, ANT+ sensors, wireless connection, and your smartphone.

From the home screen, select the status bar or swipe down from the top of the page.

The connections page appears. A flashing icon means the device is searching. You can select any icon to change the settings.

Using the Backlight

At any time, you can select anywhere on the screen to turn on the backlight.

- 1 From the home screen, select the status bar at the top of the page.
- 2 Select Brightness to adjust the backlight brightness and timeout:
 - To manually adjust the brightness, select and +.
 - To automatically adjust the brightness based on the ambient light, select Auto Brightness.
 - To adjust the timeout, select Backlight Timeout and select an option.

Acquiring Satellite Signals

The device may need a clear view of the sky to acquire satellite signals. The time and date are set automatically based on the GPS position.

1 Go outdoors to an open area.

The front of the device should be oriented toward the sky.

2 Wait while the device locates satellites.

It may take 30-60 seconds to locate satellite signals.

2 Introduction

Training

Going for a Ride

Before you can record speed and distance, you must locate satellite signals or pair your device with an optional ANT+ speed sensor.

NOTE: History is recorded only while the timer is running.

- 1 From the home screen, select RIDE.
- 2 Wait while the device locates satellites.
- 3 Select ▶ to start the timer.

4 Swipe the screen for additional data pages.

You can swipe down from the top of the data pages to view the connections page.

- **5** If necessary, tap the screen to view the timer overlay.
- 6 Select ▶ to stop the timer.
- 7 Select Save Ride.

Alerts

You can use alerts to train toward specific time, distance, calorie, heart rate, cadence, and power goals. Alert settings are saved with your activity profile.

Setting Range Alerts

If you have an optional heart rate monitor, cadence sensor, or power meter, you can set up range alerts. A range alert notifies you when the device measurement is above or below a specified range of values. For example, you can set the device to alert you when your heart rate is below 130 beats per minute (bpm) and over 150 bpm. You can also use a training zone (Training Zones) for the range alert.

- 1 From the home screen, select ★ > Activity Profiles.
- 2 Select a profile.
- 3 Select Alerts.
- 4 Select Heart Rate Alert, Cadence Alert, or Power Alert.
- **5** If necessary, turn on the alert.
- 6 Enter the minimum and maximum values, or select zones.
- 7 If necessary, select ✓.

Each time you exceed or drop below the specified range, a message appears. The device also beeps if audible tones are turned on (Setting the Device Tones).

Setting a Recurring Alert

A recurring alert notifies you every time the device records a specified value or interval. For example, you can set the device to alert you every 30 minutes.

- 1 From the home screen, select \times > Activity Profiles.
- 2 Select an activity profile.
- 3 Select Alerts.

- 4 Select Time Alert, Distance Alert, or Calorie Alert.
- 5 Turn on the alert.
- 6 Enter a value.
- 7 Select ✓.

Each time you reach the alert value, a message appears. The device also beeps if audible tones are turned on (Setting the Device Tones).

Workouts

You can create custom workouts that include goals for each workout step and for varied distances, times, and calories. You can create workouts using Garmin Connect, and transfer them to your device. You can also create and save a workout directly on your device.

You can schedule workouts using Garmin Connect. You can plan workouts in advance and store them on your device.

Following a Workout From the Web

Before you can download a workout from Garmin Connect, you must have a Garmin Connect account (Garmin Connect).

- 1 Connect the device to your computer using the USB cable.
- 2 Go to www.garminconnect.com/workouts.
- 3 Create a new workout.
- 4 Select Send to Device.
- 5 Disconnect the device, and turn it on.
- 6 Select Workouts.
- 7 Select the workout.
- 8 Select RIDE.

Creating a Workout

- 1 From the home screen, select Workouts > Create New.
- 2 Enter a workout name, and select ✓.
- 3 Select Step Type to specify the type of workout step. For example, select Rest to use the step as a rest lap. During a rest lap, the timer continues to run and data is recorded.
- 4 Select **Duration** to specify how the step is measured. For example, select **Distance** to end the step after a specific distance.
- **5** If necessary, enter a custom value for the duration.
- **6** Select **Target** to choose your goal during the step. For example, select **Heart Rate** to maintain a consistent heart rate during the step.
- 7 If necessary, select a target zone or enter a custom range. For example, you can select a heart rate zone. Each time you exceed or drop below the specified heart rate, the device beeps and displays a message.
- 8 Select ✓ to save the step.
- **9** Select **Add New Step** to add additional steps to the workout.
- **10** Select **✓** to save the workout.

Repeating Workout Steps

Before you can repeat a workout step, you must create a workout with at least one step.

- 1 Select Add New Step.
- 2 Select Step Type.
- 3 Select an option:
 - Select Repeat to repeat a step one or more times. For example, you can repeat a 5-mile step ten times.
 - Select Repeat Until to repeat a step for a specific duration. For example, you can repeat a 5-mile step for 60 minutes or until your heart rate reaches 160 bpm.

Training 3

- 4 Select Back To Step, and select a step to repeat.
- 5 Select ✓ to save the step.

Starting a Workout

- 1 From the home screen, select Workouts.
- 2 Select a workout.
- 3 Select RIDE.

After you begin a workout, the device displays each step of the workout, the target (if any), and current workout data. An audible alarm sounds when you are about to finish a workout step. A message appears, counting down the time or distance until a new step begins.

Stopping a Workout

- At any time, select
 to end a workout step.
- At any time, select to stop the timer.
- At any time, swipe down from the top of the screen to view the connections page, and select Press to Stop > ✓ to end the workout.

Editing a Workout

- 1 From the home screen, select Workouts.
- 2 Select a workout.
- 3 Select .
- 4 Select a step, and select Edit Step.
- 5 Change the step attributes, and select ✓.
- 6 Select 5 to save the workout.

Deleting a Workout

- 1 From the home screen, select Workouts.
- 2 Select a workout.
- 3 Select ✓ > 🛱 > ✓.

Using Virtual Partner®

Your Virtual Partner is a training tool designed to help you meet your goals.

- 1 Go for a ride.
- 2 Scroll to the Virtual Partner page to see who is leading.

3 If necessary, use **+** and **−** to adjust the speed of the Virtual Partner during your ride.

Courses

Following a previously recorded activity: You can follow a saved course simply because it is a good route. For example, you can save and follow a bike friendly commute to work.

Racing against a previously recorded activity: You can also follow a saved course, trying to match or exceed previously set performance goals. For example, if the original course was completed in 30 minutes, you can race against a Virtual Partner trying to complete the course in under 30 minutes.

Following an existing ride from Garmin Connect: You can send a course from Garmin Connect to your device. Once it is saved to your device, you can follow the course or race against the course.

Creating a Course on Your Device

Before you can create a course, you must have history with GPS track data saved to your device.

- 1 From the home screen, select Courses > Create New.
- 2 Select an activity on which to base your course.
- 3 Enter a name for the course and select ✓.
- 4 Select ✓.

The course appears in the list.

- 5 Select the course, and review the course data.
- 6 If necessary, select Settings to edit the course features.
 For example, you can change the name of the course or turn on Virtual Partner.
- 7 Select **→** > RIDE.

Following a Course From the Web

Before you can download a course from Garmin Connect, you must have a Garmin Connect account (Garmin Connect).

- 1 Connect the device to your computer using the USB cable.
- 2 Go to www.garminconnect.com.
- 3 Create a new course, or select an existing course.
- 4 Select Send to Device.
- 5 Disconnect the device, and turn it on.
- 6 Select Courses.
- 7 Select the course.
- 8 Select RIDE.

Tips for Training with Courses

- Use turn-by-turn navigation prompts by turning on Guide Text (Map Settings).
- If you include a warmup, select

 to begin the course, and warm up as normal.
- Stay away from your course path as you warm up. When you
 are ready to begin, head toward your course. When you are
 on any part of the course path, a message appears.

NOTE: As soon as you select **▶**, your Virtual Partner starts the course and does not wait for you to warm up.

• Scroll to the map to view the course map.

If you stray from the course, the device displays a message.

Displaying a Course on the Map

For each course saved to your device, you can customize how it appears on the map. For example, you can set your commute course to always display on the map in yellow. You can have an alternate course display in green. This allows you to see the courses while you are riding, but not follow or navigate a particular course.

- 1 From the home screen, select Courses.
- 2 Select the course.
- 3 Select Settings > Map Display.
- 4 Select Always Display > On to make the course appear on the map.
- **5** Select **Color**, and select a color.

The next time you ride near the course, it appears on the map.

Changing the Course Speed

- 1 From the home screen, select Courses.
- 2 Select a course.
- 3 Select RIDE.

4 Training

- 4 Scroll to the Virtual Partner page.
- 5 Select + or to adjust the percentage of time to complete the course.

For example, to improve your course time by 20%, enter a course speed of 120%. You will race against the Virtual Partner to finish a 30-minute course in 24 minutes.

Stopping a Course

- Scroll to the map.
- 2 Select (x) > √.

Deleting a Course

- 1 From the home screen, select Courses.
- Select a course.
- 3 Select **▼** > ✓.

Segments

Following a segment: You can send segments from Garmin Connect to your device. After a segment is saved to your device, you can follow the segment.

Racing against a segment: You can race against a segment, trying to match or exceed the group leader or challenger.

Following a Segment From the Web

Before you can download a segment from Garmin Connect, you must have a Garmin Connect account (Garmin Connect).

- 1 Connect the device to your computer using the USB cable.
- 2 Go to www.garminconnect.com.
- 3 Create a new segment, or select an existing segment.
- 4 Select Send to Device.
- 5 Disconnect the device, and turn it on.
- 6 Select Where To? > Saved > Segments.
- 7 Select the segment.
- 8 Select RIDE.

Viewing the Segment Leaderboard

Before you can view the leaderboard, you must download a segment from Garmin Connect.

The leaderboard lists ride times and average speeds for the segment leader, group leader or challenger, and your personal best time and average speed.

- 1 Select Segments.
- 2 Select a segment.
- 3 Select Leaderboard.

Racing Against a Segment

Before you can race against a segment, you must download a segment from Garmin Connect.

1 Start following a segment (Following a Segment From the Web) or a course containing a segment (Following a Course From the Web).

When you are near the starting point of a segment, a message appears.

- 2 Start racing against the segment.
- 3 If necessary, select or > to change the segment target during your race.

You can race against the group leader or challenger (if applicable).

Deleting a Segment

- 1 From the home screen, select **Segments**.
- 2 Select a segment.
- 3 Select * > ▼ > √.

Calendar

The calendar on your device is an extension of the training calendar or schedule you set up in Garmin Connect. After you have added a few workouts or courses to the Garmin Connect calendar, you can send them to your device. All scheduled activities sent to the device appear in the calendar. When you select a day in the calendar, you can view a summary of each scheduled workout, course, or completed ride, and start a scheduled activity. The scheduled activity stays on your device whether you complete it or skip it. When you send scheduled activities from Garmin Connect, they overwrite the existing calendar.

Using Garmin Connect Training Plans

Before you can download a training plan from Garmin Connect, you must have a Garmin Connect account (Garmin Connect).

You can browse Garmin Connect to find a training plan, schedule workouts and courses, and download the plan to your device.

- 1 Connect the device to your computer.
- 2 Go to www.garminconnect.com.
- 3 Select Plan > Training Plans.
- 4 Select and schedule a training plan.
- 5 Select Plan > Calendar.
- 6 Select , and follow the on-screen instructions.

Starting a Scheduled Activity

- From the home screen, select Calendar.
 Scheduled workouts and courses for the current date appear.
- **2** If necessary, select a date to view the scheduled activities.
- 3 Select >.
- 4 Select RIDE.

Personal Records

When you complete a ride, the device displays any new personal records you achieved during that ride. Personal records include your fastest time over a standard distance, longest ride, and most ascent gained during a ride.

Deleting a Personal Record

- 1 From the home screen, select **History** > **Personal Records**.
- 2 Select a personal record.
- 3 Select **☆** > **√**.

Restoring a Personal Record

You can set each personal record back to the one previously recorded.

NOTE: This does not delete any saved activities.

- 1 Select History > Personal Records.
- 2 Select a record to restore.
- 3 Select Previous Record > ✓.

Training Zones

- Heart rate zones (Setting Your Heart Rate Zones)
- Power zones (Setting Your Power Zones)

ANT+ Sensors

Your device can be used with wireless ANT+ sensors. For more information about compatibility and purchasing optional sensors, go to http://buy.garmin.com.

ANT+ Sensors 5

Putting On the Heart Rate Monitor

NOTE: If you do not have a heart rate monitor, you can skip this task.

You should wear the heart rate monitor directly on your skin, just below your breastplate. It should be snug enough to stay in place during your activity.

1 Snap the heart rate monitor module ① onto the strap.

The Garmin logos (on the module and the strap) should be right-side up.

2 Wet the electrodes ② on the back of the strap to create a strong connection between your chest and the transmitter.

- 3 If the heart rate monitor has a contact patch ③, wet the contact patch.
- **4** Wrap the strap around your chest, and connect the strap hook ④ to the loop ⑤.

The Garmin logos should be right-side up.

5 Bring the device within 10 ft. (3 m) of the heart rate monitor. After you put on the heart rate monitor, it is active and sending data.

TIP: If the heart rate data is erratic or does not appear, see Tips for Erratic Heart Rate Data.

Setting Your Heart Rate Zones

The device uses your user profile information from the initial setup to determine your heart rate zones. You can manually adjust the heart rate zones according to your fitness goals (Fitness Goals). For the most accurate calorie data during your activity, set your maximum heart rate, resting heart rate, and heart rate zones.

- 2 Enter your maximum and resting heart rate values. The zone values update automatically, but you can also edit each value manually.
- 3 Select Based On:.
- 4 Select an option:
 - Select BPM to view and edit the zones in beats per minute.

- Select % Max. to view and edit the zones as a percentage of your maximum heart rate.
- Select % HRR to view and edit the zones as a percentage of your resting heart rate.

About Heart Rate Zones

Many athletes use heart rate zones to measure and increase their cardiovascular strength and improve their level of fitness. A heart rate zone is a set range of heartbeats per minute. The five commonly accepted heart rate zones are numbered from 1 to 5 according to increasing intensity. Generally, heart rate zones are calculated based on percentages of your maximum heart rate.

Tips for Erratic Heart Rate Data

If the heart rate data is erratic or does not appear, you can try these tips.

- Reapply moisture to the electrodes and contact patch.
 You can use water, saliva, or electrode gel.
- · Tighten the strap on your chest.
- Warm up for 5–10 minutes.
- Wash the strap after every seven uses (Caring for the Heart Rate Monitor).
- Wear a cotton shirt or wet your shirt if suitable for your activity.

Synthetic fabrics that rub or flap against the heart rate monitor can create static electricity that interferes with heart rate signals.

 Move away from sources that can interfere with your heart rate monitor.

Sources of interference may include strong electromagnetic fields, some 2.4 GHz wireless sensors, high-voltage power lines, electric motors, ovens, microwave ovens, 2.4 GHz cordless phones, and wireless LAN access points.

 Replace the battery (Replacing the Heart Rate Monitor Battery).

Fitness Goals

Knowing your heart rate zones can help you measure and improve your fitness by understanding and applying these principles.

- · Your heart rate is a good measure of exercise intensity.
- Training in certain heart rate zones can help you improve cardiovascular capacity and strength.
- Knowing your heart rate zones can prevent you from overtraining and can decrease your risk of injury.

If you know your maximum heart rate, you can use the table (Heart Rate Zone Calculations) to determine the best heart rate zone for your fitness objectives.

If you do not know your maximum heart rate, use one of the calculators available on the Internet. Some gyms and health centers can provide a test that measures maximum heart rate. The default maximum heart rate is 220 minus your age.

Installing the Speed Sensor

NOTE: If you do not have this sensor, you can skip this task. **TIP:** Garmin recommends you secure your bike on a stand while installing the sensor.

- 1 Place and hold the speed sensor on top of the wheel hub.
- 2 Pull the strap ① around the wheel hub, and attach it to the hook ② on the sensor.

ANT+ Sensors

The sensor may be tilted when installed on an asymmetrical hub. This does not affect operation.

3 Rotate the wheel to check for clearance.

The sensor should not contact other parts of your bike.

NOTE: The LED flashes green for five seconds to indicate activity after two revolutions.

Installing the Cadence Sensor

NOTE: If you do not have this sensor, you can skip this task. **TIP:** Garmin recommends you secure your bike on a stand while installing the sensor.

- 1 Select the band size that fits your crank arm securely. The band you select should be the smallest one that stretches across the crank arm.
- 2 On the non-drive side, place and hold the flat side of the cadence sensor on the inside of the crank arm.
- 3 Pull the bands ① around the crank arm, and attach them to the hooks ② on the sensor.

4 Rotate the crank arm to check for clearance.

The sensor should not contact the chain stay, other parts of your bike, or your shoe.

NOTE: The LED flashes green for five seconds to indicate activity after two revolutions.

About the Speed and Cadence Sensors

Cadence data from the cadence sensor is always recorded. If no speed and cadence sensors are paired with the device, GPS data is used to calculate the speed and distance.

Cadence is your rate of pedaling or "spinning" measured by the number of revolutions of the crank arm per minute (rpm).

Data Averaging for Cadence or Power

The non-zero data-averaging setting is available if you are training with an optional cadence sensor or power meter. The default setting excludes zero values that occur when you are not pedaling.

You can change the value of this setting (Data Recording Settings).

Pairing Your ANT+ Sensors

Before you can pair, you must put on the heart rate monitor or install the sensor.

Pairing is the connecting of ANT+ wireless sensors, for example, connecting a heart rate monitor with your Garmin device.

- 1 Bring the device within 3 m (10 ft.) of the sensor.
 NOTE: Stay 10 m (33 ft.) away from other riders' ANT+ sensors while pairing.
- **2** From the home screen, select **★** > **Sensors** > **Add Sensor**.
- 3 Select an option:
 - Select a sensor type.
 - · Select Search All to search for all nearby sensors.

A list of available sensors appears.

- **4** Select one or more sensors to pair with your device.
- 5 Select Add.
- 6 If necessary, select Connect.

When the sensor is paired with your device, the sensor status is **Connected**. You can customize a data field to display sensor data.

Training with Power Meters

- Go to www.garmin.com/intosports for a list of ANT+ sensors that are compatible with your device (such as Vector™).
- For more information, see the owner's manual for your power meter.
- Adjust your power zones to match your goals and abilities (Setting Your Power Zones).
- Use range alerts to be notified when you reach a specified power zone (Setting Range Alerts).
- Customize the power data fields (Customizing the Data Pages).

Setting Your Power Zones

The values for the zones are default values and may not match your personal abilities. You can manually adjust your zones on the device or using Garmin Connect. If you know your functional threshold power (FTP) value, you can enter it and allow the software to calculate your power zones automatically.

- 1 From the home screen, select X > Training Zones > Power Zones.
- 2 Enter your FTP value.
- 3 Select Based On:.
- 4 Select an option:
 - · Select Watts to view and edit the zones in watts.
 - Select % FTP to view and edit the zones as a percentage of your functional threshold power.

Calibrating Your Power Meter

Before you can calibrate your power meter, it must be properly installed, paired with your device, and actively recording data.

For calibration instructions specific to your power meter, refer to the manufacturer's instructions.

- 1 From the home screen, select ★ > Sensors > Power > Calibrate.
- 2 Keep your power meter active by pedaling until the message appears.
- 3 Follow the on-screen instructions.

Using Shimano® Di2™ Shifters

Before you can use Di2 electronic shifters, you must pair them with your device (Pairing Your ANT+ Sensors). You can customize the optional Di2 data fields (Customizing the Data Pages). The Edge device displays current adjustment values when the sensor is in adjustment mode.

ANT+ Sensors 7

Using the Weight Scale

If you have an ANT+ compatible weight scale, the device can read the data from the weight scale.

- 1 From the home screen, select X > Weight Scale.
 A message appears when the weight scale is found.
- 2 Stand on the scale when indicated.

NOTE: If using a body composition scale, remove shoes and socks to ensure that all body composition parameters are read and recorded.

3 Step off the scale when indicated.

TIP: If an error occurs, step off the scale. Step on when indicated.

History

History includes time, distance, calories, speed, lap data, elevation, and optional ANT+ sensor information.

NOTE: History is not recorded while the timer is stopped or paused.

When the device memory is full, a message appears. The device does not automatically delete or overwrite your history. Upload your history to Garmin Connect periodically to keep track of all your ride data.

Viewing Your Ride

- 1 From the home screen, select **History** > **Rides**.
- 2 Select an option.

Deleting a Ride

- 1 From the home screen, select **History** > **Rides**.
- Select a ride.
- 3 Select **☆** > **√**.

Viewing Data Totals

You can view the accumulated data you have saved to the Edge, including the number of rides, time, distance, and calories.

From the home screen, select **History** > **Totals**.

Sending Your Ride to Garmin Connect

NOTICE

To prevent corrosion, thoroughly dry the USB port, the weather cap, and the surrounding area before charging or connecting to a computer.

1 Pull up the weather cap ① from the USB port ②.

- 2 Plug the small end of the USB cable into the USB port on the device.
- 3 Plug the large end of the USB cable into a computer USB port
- 4 Go to www.garminconnect.com/start.
- **5** Follow the on-screen instructions.

Garmin Connect

You can connect with your friends on Garmin Connect. Garmin Connect gives you the tools to track, analyze, share, and

encourage each other. Record the events of your active lifestyle including runs, walks, rides, swims, hikes, triathlons, and more. To sign up for a free account, go to www.garminconnect.com/start.

Store your activities: After you complete and save an activity with your device, you can upload that activity to Garmin Connect and keep it as long as you want.

Analyze your data: You can view more detailed information about your activity, including time, distance, elevation, heart rate, calories burned, cadence, an overhead map view, pace and speed charts, and customizable reports.

NOTE: Some data requires an optional accessory such as a heart rate monitor.

Plan your training: You can choose a fitness goal and load one of the day-by-day training plans.

Share your activities: You can connect with friends to follow each other's activities or post links to your activities on your favorite social networking sites.

Bluetooth® Connected Features

The Edge device has Bluetooth connected features for your compatible smartphone or fitness device. Some features require you to install Garmin Connect mobile on your smartphone. Go to www.garmin.com/intosports/apps for more information.

NOTE: Your device must be connected to your Bluetooth enabled smartphone to take advantage of some features.

LiveTrack: Allows friends and family to follow your races and training activities in real time. You can invite followers using email or social media, allowing them to view your live data on a Garmin Connect tracking page.

Activity uploads to Garmin Connect: Automatically sends your activity to Garmin Connect as soon as you finish recording the activity.

Course and workout downloads from Garmin Connect:
Allows you to search for activities on Garmin Connect using your smartphone and send them to your device.

Device to device transfers: Allows you to wirelessly transfer files to another compatible Edge device.

Social media interactions: Allows you to post an update to your favorite social media website when you upload an activity to Garmin Connect.

Weather updates: Sends real-time weather conditions and alerts to your device.

Notifications: Displays phone notifications and messages on your device.

Wi-Fi® Connected Features

The Edge device has Wi-Fi connected features. The Garmin Connect Mobile application is not required for you to use Wi-Fi connectivity.

NOTE: Your device must be connected to a wireless network to take advantage of these features.

Activity uploads to Garmin Connect: Automatically sends your activity to Garmin Connect as soon as you finish recording.

8 History

Courses, workouts, and training plans: Activities previously selected from Garmin Connect are sent wirelessly to your device

Software updates: Your device wirelessly downloads the latest software update. The next time you turn on the device, you can follow the on-screen instructions to update the software.

Setting Up Wi-Fi Connectivity

- 1 Go to www.garminconnect.com/start, and download the Garmin Express™ application.
- 2 Follow the on-screen instructions to set up Wi-Fi connectivity with Garmin Express.

Connecting to a Wireless Network

- Select ★ > Wi-Fi.
- 2 If necessary, select Wi-Fi to turn on wireless technology.
- 3 Select Add Network to scan for available networks.
- 4 Select a wireless network.
- 5 If necessary, select + to enter the network SSID and password.

The device stores the network information and connects automatically when you return to this location.

Data Recording

The device uses smart recording. It records key points where you change direction, speed, or heart rate.

When a power meter is paired, the device records points every second. Recording points every second provides an extremely detailed track, and uses more of the available memory.

For information about data averaging for cadence and power, see Data Averaging for Cadence or Power.

Changing the Data Storage Location

- 1 From the home screen, select ★ > System > Data Recording > Record To.
- 2 Select an option:
 - Select Internal Storage to save your data to the device memory.
 - Select Memory Card to save your data to an optional memory card.

Installing a Memory Card

You can install a microSD™ memory card for additional storage or pre-loaded maps.

1 Pull up the weather cap 1 from the microSD card slot 2.

2 Press in the card until it clicks.

Data Management

NOTE: The device is not compatible with Windows[®] 95, 98, Me, Windows NT[®], and Mac[®] OS 10.3 and earlier.

Connecting the Device to Your Computer

NOTICE

To prevent corrosion, thoroughly dry the USB port, the weather cap, and the surrounding area before charging or connecting to a computer.

- 1 Pull up the weather cap from the USB port.
- 2 Plug the small end of the USB cable into the USB port on the device.

3 Plug the large end of the USB cable into a computer USB port.

Your device and memory card (optional) appear as removable drives in My Computer on Windows computers and as mounted volumes on Mac computers.

Transferring Files to Your Device

1 Connect the device to your computer.

On Windows computers, the device appears as a removable drive or a portable device, and the memory card may appear as a second removable drive. On Mac computers, the device and memory card appear as mounted volumes.

NOTE: Some computers with multiple network drives may not display device drives properly. See your operating system documentation to learn how to map the drive.

- 2 On your computer, open the file browser.
- Select a file.
- 4 Select Edit > Copy.
- 5 Open the portable device, drive, or volume for the device or memory card.
- 6 Browse to a folder.
- 7 Select Edit > Paste.

The file appears in the list of files in the device memory or on the memory card.

Deleting Files

NOTICE

If you do not know the purpose of a file, do not delete it. Your device memory contains important system files that should not be deleted.

- 1 Open the **Garmin** drive or volume.
- 2 If necessary, open a folder or volume.
- 3 Select a file.
- 4 Press the **Delete** key on your keyboard.

Disconnecting the USB Cable

If your device is connected to your computer as a removable drive or volume, you must safely disconnect your device from your computer to avoid data loss. If your device is connected to your Windows computer as a portable device, it is not necessary to safely disconnect.

- 1 Complete an action:
 - For Windows computers, select the Safely Remove Hardware icon in the system tray, and select your device.
 - For Mac computers, drag the volume icon to the trash.
- 2 Disconnect the cable from your computer.

Navigation

Navigation features and settings also apply to navigating courses (Courses) and segments (Segments).

- Locations and finding places (Locations)
- Planning a route (Planning and Riding a Route)
- · Route settings (Route Settings)
- · Optional maps (Purchasing Additional Maps)
- Map settings (Map Settings)

Locations

You can record and store locations in the device.

Saving Your Location

You can save your present location, such as your home or parking spot.

Navigation 9

1 From the home screen, select the status bar or swipe down from the top of the page.

The connections page appears.

2 Select GPS > Mark Location > ✓.

Saving Locations from the Map

- 1 From the home screen, select Where To? > @ > A Map Point.
- 2 Browse the map for the location.
- 3 Select the location.

Location information appears at the top of the map.

- 4 Select the location information.
- 5 Select ► > ✓.

Navigating to a Location

- 1 From the home screen, select Where To?.
- 2 Select an option:
 - Select Saved to navigate to a saved course, location, or segment.
 - Select Recent Finds to navigate to one of the last 50 locations you have found.
 - Select Search Tools to navigate to a point of interest or specific address (requires routable maps), or a city, intersection, or known coordinates.
 - Select
 o to narrow your search area.
- 3 If necessary, select <u>u</u> to enter specific search information.
- 4 Select a location.
- 5 Select RIDE.
- **6** Follow the on-screen instructions to your destination.

Navigating to Known Coordinates

- 1 From the home screen, select Where To? > Search Tools > Coordinates.
- 2 Enter the coordinates, and select ✓.
- **3** Follow the on-screen instructions to your destination.

Navigating Back to Start

At any point during your ride, you can return to the starting point.

- **1** Go for a ride (Going for a Ride).
- 2 During your ride, select anywhere on the screen to view the timer overlay.
- 3 Select ♠ > Where To? > Back to Start.
- 4 Select Along Same Route or Most Direct Route.
- 5 Select RIDE.

The device navigates you back to the starting point of your ride.

Stopping Navigation

1 Select anywhere on the screen to view the timer overlay.

- 2 Scroll to the map.
- 3 Select **⊗** > **√**.

Projecting a Location

You can create a new location by projecting the distance and bearing from a marked location to a new location.

- 1 From the home screen, select Where To? > Saved > Locations.
- 2 Select a location.
- **3** Select the location information at the top of the screen.
- **4** Select **✓** > **Project Location**.
- **5** Enter the bearing and distance to the projected location.
- 6 Select ✓.

Editing Locations

- 1 From the home screen, select Where To? > Saved > Locations.
- 2 Select a location.
- 3 Select the information bar at the top of the screen.
- 4 Select A.
- 5 Select an attribute.

For example, select **Change Elevation** to enter a known altitude for the location.

6 Enter the new information, and select ✓.

Deleting a Location

- 1 From the home screen, select Where To? > Saved > Locations.
- 2 Select a location.
- **3** Select the location information at the top of the screen.
- 4 Select ✓ > Delete Location > ✓.

Planning and Riding a Route

You can create and ride a custom route. A route is a sequence of waypoints or locations that leads you to your final destination.

- 1 From the home screen, select Where To? > Route Planner > Add First Location.
- 2 Select an option:
 - To select a saved location, select Saved, and select a location.
 - To select a location for which you recently searched, select Recent Finds, and select a location.
 - To select a location on the map, select Use Map, and select a location.
 - To browse for and select a point of interest, select POI Categories, and select a nearby point of interest.
 - To select a city, select Cities, and select a nearby city.
 - To select an address, select Address, and enter the address.
 - To use coordinates, select Coordinates, and enter the coordinates.
- 3 Select Use.
- 4 Select Add Next Location.
- 5 Repeat steps 2–4 until you have selected all locations for the route.
- 6 Select View Route.

The device calculates your route, and a map of the route appears.

TIP: You can select **\(\Lambda \)** to view an elevation plot of the route.

7 Select RIDE.

Navigation Navigation

Creating a Round-Trip Route

The device can create a round-trip route based on a specified distance and a starting location.

- 1 From the home screen, select Where To? > Round-Trip Routing.
- 2 Select Distance, and enter the total distance for the route.
- 3 Select Start Location.
- 4 Select an option:
 - · Select Current Location.

NOTE: If the device cannot acquire satellite signals to determine your current location, the device prompts you to use the last known location or to select the location on the map.

- Select Use Map to select a location on the map.
- 5 Select Search.

TIP: You can select **5** to search again.

6 Select a route to view it on the map.

TIP: You can select \triangleleft and \triangleright to view the other routes.

7 Select RIDE.

Route Settings

Select ★ > Activity Profiles, select a profile, and select Navigation > Routing.

Routing Mode: Allows you to select an activity for the device to calculate your route (Selecting an Activity for Route Calculation).

Calculation Method: Allows you to select the calculation method to optimize your route.

Lock On Road (requires routable maps): Locks the position icon, which represents your position on the map, onto the nearest road.

Avoidance Setup (requires routable maps): Allows you to select the road type you want to avoid.

Recalculation (requires routable maps): Allows you to select the recalculation method when you deviate from the route.

Selecting an Activity for Route Calculation

You can set the device to calculate the route based on activity type.

- 1 From the home screen, select \times > Activity Profiles.
- 2 Select a profile.
- 3 Select Navigation > Routing > Routing Mode.
- 4 Select an option to calculate your route.
 For example, you can select Tour Cycling for on-road navigation or Mountain Biking for off-road navigation.

Map Settings

Select ★ > Activity Profiles, select a profile, and select Navigation > Map.

Orientation: Sets how the map is shown on the page.

Auto Zoom: Automatically selects a zoom level for the map. When **Off** is selected, you must zoom in or out manually.

Guide Text: Sets when the turn-by-turn navigation prompts are shown (requires routable maps).

Map Visibility: Allows you to set advanced map features. **Map Information**: Enables or disables the maps currently

Changing the Map Orientation

1 Select X > Activity Profiles.

loaded on the device.

- 2 Select a profile.
- 3 Select Navigation > Map > Orientation.

- 4 Select an option:
 - · Select North Up to show north at the top of the page.
 - Select Track Up to show your current direction of travel at the top of the page.
 - Select **3D Mode** to display the map in three dimensions.

Advanced Map Settings

Select ★ > Activity Profiles, select a profile, and select Navigation > Map > Map Visibility.

Map Visibility Mode: Auto and **High Contrast** have preset values. You can choose **Custom** to set each value.

Zoom Levels: Sets map items to draw or appear at or below the selected zoom level.

Text Size: Sets the text size for map items.

Detail: Sets the amount of detail shown on the map. Showing more detail may cause the map to redraw more slowly.

Shaded Relief: Shows detail relief on the map (if available) or turns off shading.

Purchasing Additional Maps

Before purchasing additional maps, you should determine the version of the maps that are loaded on your device.

- 1 From the home screen, select \times > Activity Profiles.
- Select a profile.
- 3 Select Navigation > Map > Map Information.
- 4 Select a map.
- 5 Select 1.
- **6** Go to http://buy.garmin.com, or contact your Garmin dealer.

Finding an Address

You can use the preloaded Garmin Cycle Map (if available) or optional City Navigator® maps to search for addresses, cities, and other locations. The detailed and routable maps contain millions of points of interest, such as restaurants, hotels, and auto services.

- 1 From the home screen, select Where To? > Search Tools > Addresses.
- **2** Follow the on-screen instructions.

TIP: If you are unsure of the city, select Search All.

3 Select the address, and select RIDE.

Finding a Point of Interest

- 1 From the home screen, select Where To? > Search Tools > POI Categories.
- 2 Select a category.

TIP: If you know the name of the business, select **All POIs** > **III** to enter the name.

- **3** If necessary, select a subcategory.
- 4 Select the location, and select RIDE.

Finding Nearby Locations

- 1 From the home screen, select Where To? > @.
- 2 Select an option.

For example, select **A Recent Find** to search for a restaurant near the address you recently searched for.

- 3 If necessary, select a category and subcategory.
- 4 Select the location, and select RIDE.

Topographical Maps

Your device may include topographical maps or you can purchase them from http://buy.garmin.com. Garmin recommends that you download BaseCamp™ to plan your routes and activities using topographical maps.

Navigation 11

Customizing Your Device

Profiles

The Edge has several ways for you to customize the device, including profiles. Profiles are a collection of settings that optimize your device based on how you are using it. For example, you can create different settings and views for training and mountain biking.

When you are using a profile and you change settings such as data fields or units of measurement, the changes are saved automatically as part of the profile.

Activity Profiles: You can create activity profiles for each type of biking. For example, you can create a separate activity profile for training, for racing, and for mountain biking. The activity profile includes customized data pages, activity totals, alerts, training zones (such as heart rate and speed), training settings (such as Auto Pause® and Auto Lap®), and navigation settings.

User Profile: You can update your gender, age, weight, height, and lifetime athlete settings. The device uses this information to calculate accurate ride data.

Updating Your Activity Profile

You can customize ten activity profiles. You can customize your settings and data fields for a particular activity or trip.

- 1 From the home screen, select \times > Activity Profiles.
- 2 Select an option:
 - · Select a profile.
 - Select + to add a new profile.
- **3** If necessary, edit the name and color for the profile.
- 4 Select an option:
 - Select Data Screens to customize the data pages and data fields (Customizing the Data Pages).
 - · Select Alerts to customize your training alerts (Alerts).
 - Select Navigation to customize your map (Map Settings) and route (Route Settings) settings.
 - Select Auto Features > Auto Lap to set how laps are triggered (Marking Laps by Position).
 - Select Auto Features > Auto Pause to change when the timer automatically pauses (Using Auto Pause).
 - Select Auto Features > Auto Sleep to automatically enter sleep mode after five minutes of inactivity (Using Auto Sleep).
 - Select Auto Features > Auto Scroll to customize the display of the training data pages when the timer is running (Using Auto Scroll).
 - Select Start Notice to customize the start notice mode (Changing the Start Notice).

All changes are saved to the activity profile.

Setting Up Your User Profile

You can update your gender, age, weight, height, and lifetime athlete settings. The device uses this information to calculate accurate ride data.

- 1 From the home screen, select **★** > **User Profile**.
- 2 Select an option.

About Lifetime Athletes

A lifetime athlete is an individual who has trained intensely for many years (with the exception of minor injuries) and has a resting heart rate of 60 beats per minute (bpm) or less.

Bluetooth Settings

Select X > Bluetooth.

Enable: Enables Bluetooth wireless technology.

NOTE: Other Bluetooth settings appear only when Bluetooth is enabled.

Friendly Name: Allows you to enter a friendly name that identifies your devices with Bluetooth wireless technology.

Pair Smartphone: Connects your device with a compatible Bluetooth-enabled smartphone.

Wi-Fi Settings

Select X > Wi-Fi.

Wi-Fi: Enables Wi-Fi wireless technology.

NOTE: Other Wi-Fi settings appear only when Wi-Fi is enabled.

Auto Upload: Allows you to upload activities automatically over a known wireless network.

Add Network: Connects your device to a wireless network.

About Training Settings

The following options and settings allow you to customize your device based on your training needs. These settings are saved to an activity profile. For example, you can set time alerts for your racing profile and you can set an Auto Lap position trigger for your mountain biking profile.

Customizing the Data Pages

You can customize data pages for each activity profile.

- 1 From the home screen, select ***** > **Activity Profiles**.
- 2 Select a profile.
- 3 Select Data Screens.
- 4 Select a data page.
- **5** If necessary, enable the data page.
- 6 Select the number of data fields to appear on the page.
- 7 Select ✓.
- 8 Select a data field to change it.
- 9 Select ✓.

Using Auto Pause

You can use the Auto Pause feature to pause the timer automatically when you stop moving or when your speed drops below a specified value. This feature is helpful if your ride includes stop lights or other places where you need to slow down or stop.

NOTE: History is not recorded while the timer is stopped or paused.

- 1 From the home screen, select **★** > **Activity Profiles**.
- 2 Select a profile.
- 3 Select Auto Features > Auto Pause.
- 4 Select an option:
 - Select When Stopped to pause the timer automatically when you stop moving.
 - Select Custom Speed to pause the timer automatically when your speed drops below a specified value.
- 5 If necessary, customize optional time data fields (Customizing the Data Pages).

The **Time - Elapsed** data field displays the entire time including paused time.

Marking Laps by Position

You can use the Auto Lap feature to mark the lap at a specific position automatically. This feature is helpful for comparing your performance over different parts of a ride (for example, a long climb or training sprints). During courses, use the **By Position** option to trigger laps at all of the lap positions saved in the course.

- 1 From the home screen, select * > Activity Profiles.
- 2 Select a profile.
- 3 Select Auto Features > Auto Lap > Auto Lap Trigger > By Position > Lap At.
- 4 Select an option:
 - Select Lap Press Only to trigger the lap counter each time you select and each time you pass any of those locations again.
 - Select Start and Lap to trigger the lap counter at the GPS location where you select ▶ and at any location during the ride where you select ♠.
 - Select Mark and Lap to trigger the lap counter at a specific GPS location marked before the ride and at any location during the ride where you select .
- 5 If necessary, customize the lap data fields (Customizing the Data Pages).

Marking Laps by Distance

You can use Auto Lap to automatically mark the lap at a specific distance. This feature is helpful for comparing your performance over different parts of a ride (for example, every 10 miles or 40 kilometers).

- 1 From the home screen, select ★ > Activity Profiles.
- 2 Select a profile.
- 3 Select Auto Features > Auto Lap > Auto Lap Trigger > By Distance > Lap At.
- 4 Enter a value
- 5 If necessary, customize the lap data fields (Customizing the Data Pages).

Using Auto Scroll

You can use the auto scroll feature to automatically cycle through all of the training data pages while the timer is running.

- 1 From the home screen, select * > Activity Profiles.
- Select a profile.
- 3 Select Auto Features > Auto Scroll.
- 4 Select a display speed.

Changing the Start Notice

This feature automatically detects when your device has acquired satellites and is moving. It is a reminder to start the timer so you can record your ride data.

- 1 From the home screen, select \times > Activity Profiles.
- Select a profile.
- 3 Select Start Notice.
- 4 If necessary, select Start Notice Mode.
- 5 Select an option:
 - Select Once.
 - Select Repeat > Repeat Delay to change the amount of time to delay the reminder.

System Settings

Select * > System.

- GPS Settings (GPS Settings)
- Display Settings (Display Settings)
- · Data Recording Settings (Data Recording Settings)
- Unit Settings (Changing the Units of Measure)
- Configuration Settings (Changing the Configuration Settings)
- Language Settings (Changing the Device Language)
- Tone Settings (Setting the Device Tones)

GPS Settings

Training Indoors

You can turn GPS off when you are training indoors or to save battery life.

From the home screen, select * > System > GPS > GPS Mode > Off.

When GPS is off, speed and distance are not available unless you have an optional sensor that sends speed and distance data to the device (such as a speed or cadence monitor). The next time you turn on the device, it will search for satellite signals again.

Setting Your Elevation

If you have accurate elevation data for your present location, you can manually calibrate the altimeter on your device.

- 2 Enter the elevation, and select ✓.

Viewing Satellites

The satellite page shows your current GPS satellite information. For more information about GPS, go to www.garmin.com/aboutGPS.

From the home screen, select * > System > GPS > View Satellites.

GPS accuracy appears at the bottom of the page. The green bars represent the strength of each satellite signal received (the number of the satellite appears below each bar).

Display Settings

Select **※** > System > Display.

Auto Brightness: Automatically adjusts the backlight brightness based on the ambient light.

Backlight Timeout: Sets the length of time before the backlight turns off.

Color Mode: Sets the device to display day or night colors. You can select **Auto** to allow the device to automatically set day or night colors based on the time of day.

Screen Capture: Allows you to save the image on the device screen.

Data Recording Settings

Select X > System > Data Recording.

Record To: Sets the data storage location (Changing the Data Storage Location).

Recording Interval: Controls how the device records activity data. **Smart** records key points where you change direction, speed, or heart rate. **1 Sec.** records points every second. It creates a very detailed record of your activity and increases the size of the activity.

Data Averaging: Controls whether the device includes zero values for cadence and power data that occur when you are not pedaling (Data Averaging for Cadence or Power).

Changing the Units of Measure

You can customize units of measure for distance and speed, elevation, temperature, weight, position format, and time format.

- 1 Select ★ > System > Units.
- 2 Select a measurement type.
- 3 Select a unit of measure for the setting.

Setting the Device Tones

From the home screen, select * > System > Tones.

Changing the Device Language

From the home screen, select * > System > Language.

Customizing Your Device 13

Changing the Configuration Settings

You can modify all of the settings you configured in the initial setup.

- 1 Select X > System > Device Reset > Initial Setup.
- 2 Follow the on-screen instructions.

Time Zones

Each time you turn on the device and acquire satellites, the device automatically detects your time zone and the current time of day.

Device Information

Specifications

Edge Specifications

Battery type	Rechargable, built-in lithium-ion battery
Battery life	15 hours, typical usage
Operating temperature range	From -20° to 60°C (from -4° to 140°F)
Charging temperature range	From 0° to 40°C (from 32° to 104°F)
Water rating	IEC 60529 IPX7*

^{*}The device withstands incidental exposure to water of up to 1 meter for up to 30 minutes.

Heart Rate Monitor Specifications

Battery type	User-replaceable CR2032, 3 volts	
Battery life	Up to 4.5 years (1 hour per day)	
Operating temperature range	From -5° to 50°C (from 23° to 122°F)	
Radio frequency/ protocol	2.4 GHz ANT+ wireless communications protocol	
Water rating	3 ATM*	
	NOTE: This product does not transmit heart rate data while swimming.	

^{*}The device withstands pressure equivalent to a depth of 30 meters.

Speed Sensor and Cadence Sensor Specifications

Battery type	User-replaceable CR2032, 3 volts
Battery life	Approximately 12 months (1 hour per day)
Operating temperature range	From -20° to 60°C (from -4° to 140°F)
Radio frequency/protocol	2.4 GHz ANT+ wireless communications protocol
Water rating	1 ATM*

^{*}The device withstands pressure equivalent to a depth of 10 meters.

Device Care

NOTICE

Do not store the device where prolonged exposure to extreme temperatures can occur, because it can cause permanent damage.

Never use a hard or sharp object to operate the touch screen, or damage may result.

Avoid chemical cleaners and solvents that can damage plastic components.

Secure the weather cap tightly to prevent damage to the USB port.

Cleaning the Device

 Wipe the device using a cloth dampened with a mild detergent solution. 2 Wipe it dry.

Caring for the Heart Rate Monitor

NOTICE

You must unsnap and remove the module before cleaning the strap.

A build up of sweat and salt on the strap can decrease the ability of the heart rate monitor to report accurate data.

- Go to www.garmin.com/HRMcare for detailed washing instructions.
- · Rinse the strap after every use.
- Machine wash the strap after every seven uses.
- · Do not put the strap in a dryer.
- When drying the strap, hang it up or lay it flat.
- To prolong the life of your heart rate monitor, unsnap the module when not in use.

User Replaceable Batteries

△ WARNING

Do not use a sharp object to remove batteries.

Keep the battery away from children.

Never put batteries in mouth. If swallowed, contact your physician or local poison control center.

Replaceable coin cell batteries may contain perchlorate material. Special handling may apply. See www.dtsc.ca.gov.hazardouswaste/perchlorate.

△ CAUTION

Contact your local waste disposal department to properly recycle the batteries.

Replacing the Heart Rate Monitor Battery

- 1 Use a small Phillips screwdriver to remove the four screws on the back of the module.
- 2 Remove the cover and battery.

- 3 Wait 30 seconds.
- 4 Insert the new battery with the positive side facing up.
 NOTE: Do not damage or lose the O-ring gasket.
- 5 Replace the back cover and the four screws.
 NOTE: Do not overtighten.

After you replace the heart rate monitor battery, you may need to pair it with the device again.

Replacing the Speed Sensor or Cadence Sensor Battery

The LED flashes red to indicate a low battery level after two revolutions.

 Locate the circular battery cover ① on the back of the sensor.

- 2 Twist the cover counter-clockwise until the marker points to unlocked and the cover is loose enough to remove.
- 3 Remove the cover and the battery ②.
- 4 Wait 30 seconds.
- **5** Insert the new battery with the positive side facing up.

NOTE: Do not damage or lose the O-ring gasket.

6 Twist the cover clockwise until the marker points to locked.

NOTE: The LED flashes red and green for a few seconds after battery replacement. When the LED flashes green and then stops flashing, the device is active and ready to send data.

Troubleshooting

Resetting the Device

If the device stops responding, you may need to reset it. This does not erase any of your data or settings.

Hold () for 10 seconds.

The device resets and turns on.

Clearing User Data

You can restore all of the device settings to the factory default values.

NOTE: This deletes all user-entered information, but it does not delete your history.

Select X > System > Device Reset > Factory Reset > ✓.

Maximizing Battery Life

- Decrease the backlight or shorten the backlight timeout (Using the Backlight).
- Select the Smart recording interval (Data Recording Settings).
- Turn on the Auto Sleep feature (Using Auto Sleep).
- Turn off the Bluetooth wireless feature (Bluetooth Settings).
- Turn off wireless connectivity (Wi-Fi Settings).

Using Auto Sleep

You can use auto sleep to automatically enter sleep mode after 5 minutes of inactivity. During sleep mode, the screen is turned off and the ANT+ sensors, Bluetooth, and GPS are disconnected. Wi-Fi continues to run while the device is asleep.

- 1 From the home screen, select X > Activity Profiles.
- Select a profile.
- 3 Select Auto Features > Auto Sleep.

Improving GPS Satellite Reception

- Connect your device to a wireless network.
 Satellite information is wirelessly downloaded to your device, allowing it to quickly locate satellite signals.
- Pair your device with a Bluetooth enabled smartphone.
 Satellite information is sent to your device, allowing it to quickly locate satellite signals.
- Take your device outside to an open area away from tall buildings and trees.
- Remain stationary for several minutes.

Getting More Information

- · Go to www.garmin.com/intosports.
- Go to www.garmin.com/learningcenter.
- Go to http://buy.garmin.com, or contact your Garmin dealer for information about optional accessories and replacement parts.

Temperature Readings

The device may display temperature readings that are higher than the actual air temperature if the device is placed in direct sunlight, held in your hand, or is charging with an external battery pack. Also, the device will take some time to adjust to significant changes in temperature.

Viewing Device Information

You can view the unit ID, software version, and license agreement.

From the home screen, select * > System > About.

Replacement O-rings

Replacement bands (O-rings) are available for the standard mount in two sizes:

- 1.3 × 1.5 × 0.9 in. AS568-125
- 1.7 × 1.9 × 0.9 in. AS568-131

NOTE: Use Ethylene Propylene Diene Monomer (EPDM) replacement bands only. Go to http://buy.garmin.com, or contact your Garmin dealer.

Updating the Software

Before you can update your device software, you must have a Garmin Connect account, and you must download the Garmin Express application.

- 1 Connect the device to your computer using the USB cable. When new software is available, Garmin Express sends it to your device.
- 2 Follow the on-screen instructions.
- 3 Do not disconnect your device from the computer during the update process.

NOTE: If you have already used Garmin Express to set up your device with Wi-Fi connectivity, Garmin Connect can automatically download available software updates to your device when it connects using Wi-Fi.

Appendix

Registering Your Device

Help us better support you by completing our online registration today.

- Go to http://my.garmin.com.
- Keep the original sales receipt, or a photocopy, in a safe place.

Data Fields

Some data fields require ANT+ accessories to display data.

Balance: The current left/right power balance.

Balance - 10s Avg.: The 10-second moving average of the left/ right power balance.

Balance - 30s Avg.: The 30-second moving average of the left/ right power balance.

Balance - 3s Avg.: The three-second moving average of the left/right power balance.

Troubleshooting 15

Balance - Avg.: The average left/right power balance for the current activity.

Balance - Lap: The average left/right power balance for the current lap.

Battery Level: The remaining battery power.

Cadence: The number of revolutions of the crank arm or number of strides per minute. Your device must be connected to a cadence accessory for this data to appear.

Cadence - Avg.: The average cadence for the current activity.

Cadence - Lap: The average cadence for the current lap.

Calories: The amount of total calories burned.

Calories - Fat: The amount of fat calories burned. Requires a New Leaf[®] assessment.

Calories to Go: During a workout, the remaining calories when you are using a calorie target.

Course Pt. Dist.: The remaining distance to the next point on the course.

Di2 Battery Level: The remaining battery power of a Di2 sensor.

Di2 Front Gear: The front bike gear from a Di2 sensor.

Di2 Gear Ratio: The number of teeth on the front and rear bike gears.

Di2 Gears: The front and rear bike gears from a Di2 sensor.

Di2 Rear Gear: The rear bike gear from a Di2 sensor.

Dist. - Lap: The distance traveled for the current lap.

Dist. - Last Lap: The distance traveled for the last completed lap.

Dist. to Dest.: The remaining distance to the final destination. You must be navigating for this data to appear.

Dist. to Go: During a workout or course, the remaining distance when you are using a distance target.

Dist. to Next: The remaining distance to the next waypoint on the route. You must be navigating for this data to appear.

Distance: The distance traveled for the current track or activity.

Elevation: The altitude of your current location above or below sea level.

ETA at Destination: The estimated time of day when you will reach the final destination (adjusted to the local time of the destination). You must be navigating for this data to appear.

ETA at Next: The estimated time of day when you will reach the next waypoint on the route (adjusted to the local time of the waypoint). You must be navigating for this data to appear.

GPS Accuracy: The margin of error for your exact location. For example, your GPS location is accurate to within +/- 3.65 m (12 ft.).

GPS Signal Strength: The strength of the GPS satellite signal.

Grade: The calculation of rise (elevation) over run (distance). For example, if for every 10 feet (3 m) you climb you travel 200 feet (60 m), the grade is 5%.

Heading: The direction you are moving.

Heart Rate: Your heart rate in beats per minute (bpm). Your device must be connected to a compatible heart rate monitor.

HR - %**HRR**: The percentage of heart rate reserve (maximum heart rate minus resting heart rate).

HR - %Max: The percentage of maximum heart rate.

HR - Avg.: The average heart rate for the current activity.

HR - Avg. %HRR: The average percentage of heart rate reserve (maximum heart rate minus resting heart rate) for the current activity.

HR - Avg. %Max: The average percentage of maximum heart rate for the current activity.

HR Graph: A line graph showing your current heart rate zone (1 to 5).

HR - Lap: The average heart rate for the current lap.

HR - Lap %HRR: The average percentage of heart rate reserve (maximum heart rate minus resting heart rate) for the current lap.

HR - Lap %Max: The average percentage of maximum heart rate for the current lap.

HR - Last Lap: The average heart rate for the last completed lap.

HR to Go: During a workout, the amount you are above or below the heart rate target.

HR Zone: The current range of your heart rate (1 to 5). The default zones are based on your user profile and maximum heart rate (220 minus your age).

Laps: The number of laps completed for the current activity.

Location at Dest.: The last point on the route or course.

Location at Next: The next point on the route or course.

Odometer: A running tally of distance traveled for all trips. This total does not clear when resetting the trip data.

Pedal Smooth.: The measurement of how evenly a rider is applying force to the pedals throughout each pedal stroke.

Power: The current power output in watts.

Power - %FTP: The current power output as a percentage of functional threshold power.

Power - 10s Avg.: The 10-second moving average of power output.

Power - 30s Avg.: The 30-second moving average of power output.

Power - 3s Avg.: The three-second moving average of power output.

Power - Avg.: The average power output for the current activity.

Power - IF: The Intensity Factor™ for the current activity.

Power - kJ: The accumulated work performed (power output) in kilojoules.

Power - Lap: The average power output for the current lap.

Power - Lap Max.: The top power output for the current lap.

Power - Last Lap: The average power output for the last completed lap.

Power - Max.: The top power output for the current activity.

Power - NP: The Normalized Power™ for the current activity.

Power - NP Lap: The average Normalized Power for the current lap.

Power - NP Last Lap: The average Normalized Power for the last completed lap.

Power - TSS: The Training Stress Score™ for the current activity.

Power - watts/kg: The amount of power output in watts per kilogram.

Power Zone: The current range of power output (1 to 7) based on your FTP or custom settings.

Reps to Go: During a workout, the remaining repetitions.

Speed: The current rate of travel.

Speed - Avg.: The average speed for the current activity.

Speed - Lap: The average speed for the current lap.

Speed - Last Lap: The average speed for the last completed lap.

Speed - Max.: The top speed for the current activity.

Sunrise: The time of sunrise based on your GPS position.

Sunset: The time of sunset based on your GPS position.

16 Appendix

Temperature: The temperature of the air. Your body temperature affects the temperature sensor.

Time: The stopwatch time for the current activity.

Time - Avg. Lap: The average lap time for the current activity.

Time - Elapsed: The total time recorded. For example, if you start the timer and run for 10 minutes, then stop the timer for 5 minutes, then start the timer and run for 20 minutes, your elapsed time is 35 minutes.

Time - Lap: The stopwatch time for the current lap.

Time - Last Lap: The stopwatch time for the last completed lap.

Time of Day: The current time of day based on your current location and time settings (format, time zone, daylight saving time).

Time to Dest.: The estimated time remaining before you reach the destination. You must be navigating for this data to appear.

Time to Go: During a workout, the remaining time when you are using a time target.

Time to Next: The estimated time remaining before you reach the next waypoint in the route. You must be navigating for this data to appear.

Torque Effect.: The measurement of how efficiently a rider is pedaling.

Total Ascent: The total elevation distance ascended since the last reset

Total Descent: The total elevation distance descended since the last reset.

Vertical Speed: The rate of ascent or descent over time.

VS - 30s Avg.: The 30-second moving average of vertical speed

Workout Step: During a workout, the current step out of the total number of steps.

Heart Rate Zone Calculations

Zone	% of Maximum Heart Rate	Perceived Exertion	Benefits
1	50–60%	Relaxed, easy pace, rhythmic breathing	Beginning-level aerobic training, reduces stress
2	60–70%	Comfortable pace, slightly deeper breathing, conversation possible	Basic cardiovascular training, good recovery pace
3	70–80%	Moderate pace, more difficult to hold conversation	Improved aerobic capacity, optimal cardiovascular training
4	80–90%	Fast pace and a bit uncomfortable, breathing forceful	Improved anaerobic capacity and threshold, improved speed
5	90–100%	Sprinting pace, unsustainable for long period of time, labored breathing	Anaerobic and muscular endurance, increased power

Wheel Size and Circumference

The wheel size is marked on both sides of the tire. This is not a comprehensive list. You can also use one of the calculators available on the Internet.

Wheel Size	L (mm)
12 × 1.75	935
14 × 1.5	1020
14 × 1.75	1055

Wheel Size	L (mm)
16 × 1.5	1185
16 × 1.75	1195
18 × 1.5	1340
18 × 1.75	1350
20 × 1.75	1515
20 × 1-3/8	1615
22 × 1-3/8	1770
22 × 1-1/2	1785
24 × 1	1753
24 × 3/4 Tubular	1785
24 × 1-1/8	1795
24 × 1-1/4	1905
24 × 1.75	1890
24 × 2.00	1925
24 × 2.125	1965
26 × 7/8	1920
26 × 1(59)	1913
26 × 1(65)	1952
26 × 1.25	1953
26 × 1-1/8	1970
26 × 1-3/8	2068
26 × 1-1/2	2100
26 × 1.40	2005
26 × 1.50	2010
26 × 1.75	2023
26 × 1.95	2050
26 × 2.00	2055
26 × 2.10	2068
26 × 2.125	2070
26 × 2.35	2083
26 × 3.00	2170
27 × 1	2145
27 × 1-1/8	2155
27 × 1-1/6	2161
27 × 1-3/8	2169
650 × 35A	2090
650 × 38A	2125
650 × 38B	2105
700 × 18C	
	2070
700 × 19C	2080
700 × 20C	2086
700 × 23C	2096
700 × 25C	2105
700 × 28C	2136
700 × 30C	2170
700 × 32C	2155
700C Tubular	2130
